Empathize & Discover

Date	31 January 2025
Team ID	SWTID-2026-9508
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Empathy Map Canvas:

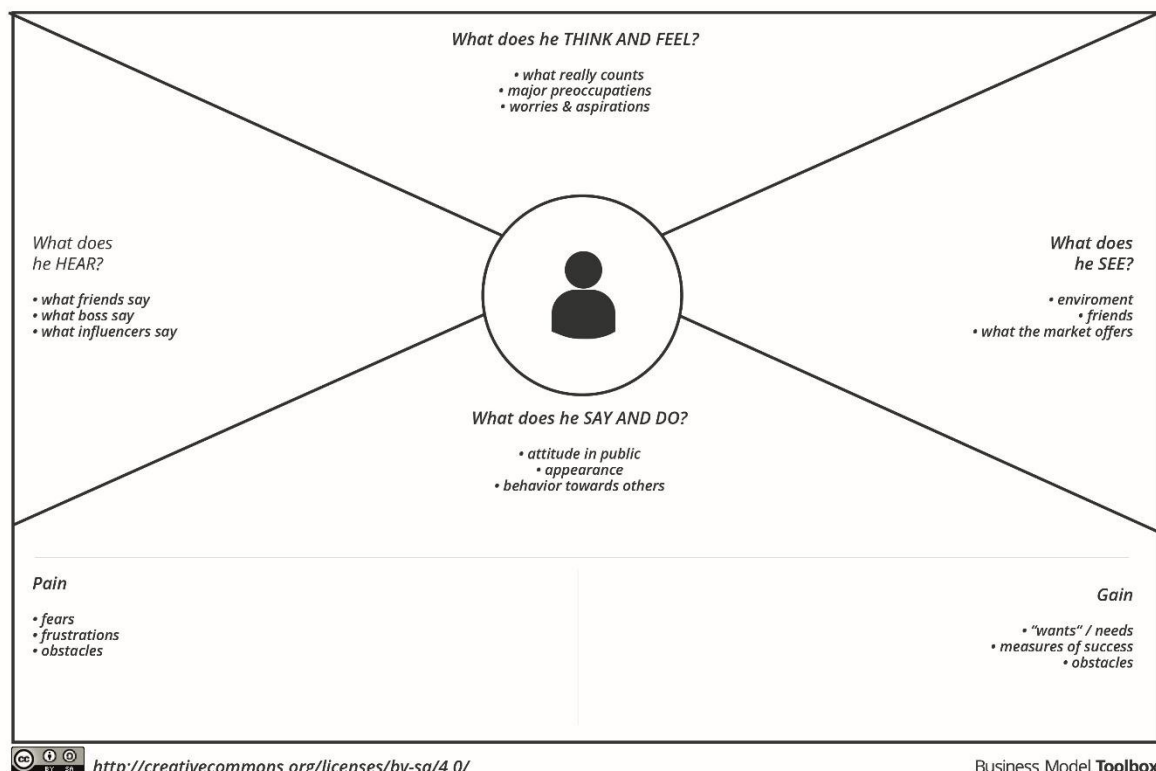

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

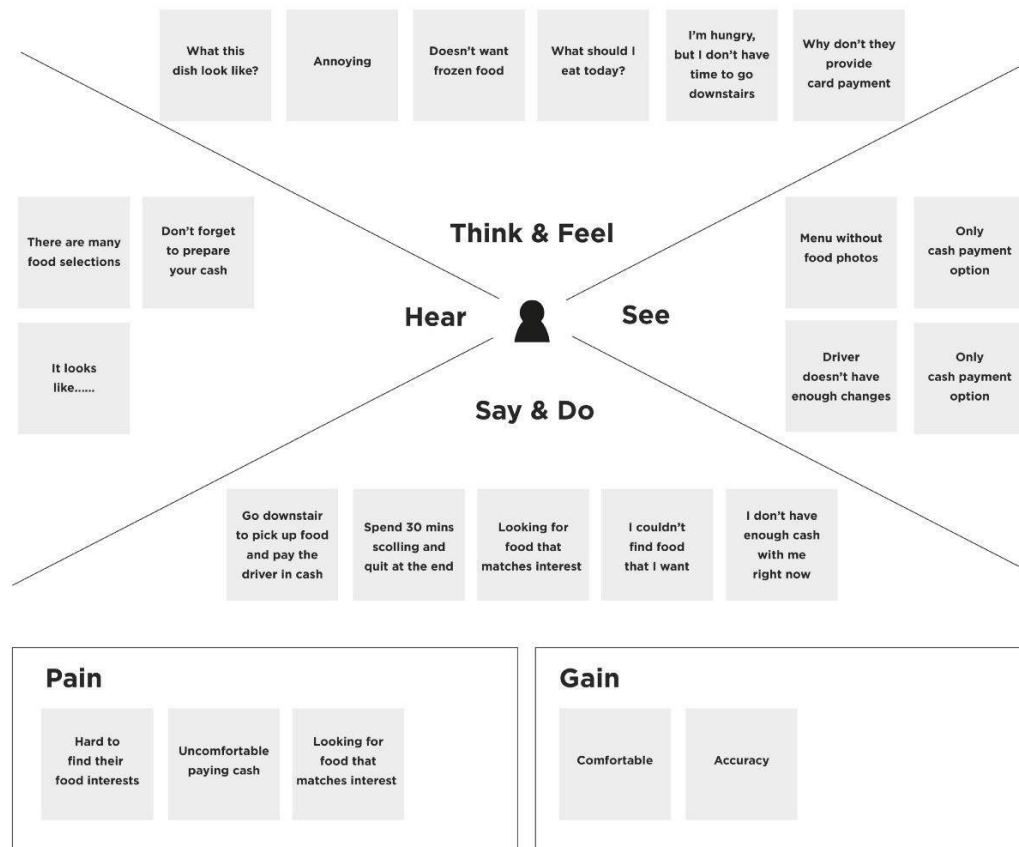

Example:

Empathy Map

Our Empathy Map: Credit Card Approval Prediction System

Persona 1: Bank Credit Officer

Says	"Every file takes me several minutes to check manually, and I still second-guess my own decision."
Thinks	"I wish there was a consistent, fast way to score risk instead of relying on gut feel each time."
Does	Cross-verifies income proof, employment records, existing liabilities, and past repayment history for each applicant by hand.
Feels	Pressured by volume and time constraints, and worried about approving a risky applicant or wrongly rejecting a good one.
Pain Points	Repetitive manual checks, no shared standard across officers, higher chance of error when reviewing many files back-to-back.
Gains / Needs	An instant, data-backed recommendation that speeds up review while still letting the officer confirm the final call.

Persona 2: Credit Card Applicant

Says	"It's been three days and I still don't know if my card is approved."
Thinks	"I wonder if my income was enough, or if something else worked against me."
Does	Submits income proof and personal details online, then checks status repeatedly with no real update.
Feels	Impatient during the wait, and disappointed when a rejection arrives without a clear reason.
Pain Points	No visibility into progress, unclear turnaround time, decisions that can feel arbitrary.
Gains / Needs	A prompt, clearly justified decision that doesn't depend on which officer reviewed the file.
