

Project Design Phase-II Customer Journey Map

Date	11 July 2026
Team ID	SWTID-2026-9508
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Scenario: An individual discovers, applies for, and receives a decision on a credit card application through the Credit Card Approval Prediction System.

	Entice	Enter	Engage	Exit	Extend
Steps	Learns a credit card can be applied for online / through a bank portal	Opens the application form and begins entering personal and financial details	Submits the completed form and waits for the prediction result	Views the Approved / Rejected result on the result page	Receives further communication (approval next steps, or guidance if rejected)
Interactions	Bank website / branch notice about online applications	Web-based application form (HTML/Bootstrap UI)	Flask backend processing the form and running the ML model	Result page showing the prediction outcome	Follow-up email or in-branch communication from the bank
Goals & Motivations	Help me find a fast way to apply for a credit card	Help me fill this form correctly without confusion	Help me get a decision quickly instead of waiting days	Help me understand clearly whether I was approved or rejected	Help me know what to do next either way
Positive Moments	Excited that applying online looks quick and simple	Form is short and clearly laid out, easy to complete	Reassured knowing the decision won't take days	Relief and satisfaction on seeing an instant, clear result	Feels the process was modern and respectful of their time
Negative Moments	Unsure if online application is trustworthy or accurate	Confusion if a field is unclear (e.g., what counts as income)	Mild anxiety during the few seconds of processing	Frustration if rejected with no explanation of why	No follow-up guidance on improving eligibility for next time
Areas of Opportunity	Add short reassurance text about data privacy on the landing page	Add helper tooltips next to form fields to reduce confusion	Add a simple loading indicator so the wait feels intentional, not stalled	Show a short explanation of key factors behind the decision	Send a follow-up email/message with next steps or improvement tips
